## PROJECTS

---

### WiFi Card Generator

Personal Project | HTML, CSS, JavaScript

- Created a tool that allows users to generate a WiFi access card with QR Code for easy network sharing.
- Users can input WiFi SSID, password, and security type to generate a printable card with both text details and a QR code.

### Snake Game

Personal Project | Python (Pygame)

- Developed the classic Snake Game using Python and the Pygame library, with smooth keyboard controls and real-time game play.
- Implemented core game mechanics such as collision detection, scoring system, speed increase, and game over logic.

### SwiftCart - ECommerce website

Personal Project | HTML, CSS , JavaScript

- Designed and developed a fully functional ecommerce frontend website named SwiftCart with modern UI/UX.
- Used HTML for structure, CSS for styling, and added responsive design for mobile-friendly.

## ACHIEVEMENTS:

---

- Successfully completed Python Vocational Training Program conducted by IIT Kanpur (2023–24).
